DRINKING WATER TEST KITS

Drinking Water Test Kits that Fit Your Professional Testing Needs

DESIGNED FOR PROFESSIONALS – WATER TREATMENT • HOME INSPECTOR • REALTOR • SWCD • USDA

Reasons why Safe Home[®] Pro Drinking Water Test Kits should be a part of your sales program:

SAFE HOME[®] PRO - MEETING THE DEMAND: According to a 2015 Gallup Poll, 61% of American homeowners want to know if their drinking water is safe—that's more than 76 million households who have interest in drinking water testing. From this number, there is a select group of people who desire or require 100% EPA-certified lab testing. Many of these people are your existing or prospective customers. As a professional, you are looking for high-integrity lab testing that is backed by a strong in-lab QC. Welcome to Safe Home[®] Pro.

THE DIFFERENCE: Our entire test kit structure is backed by our parent company, Environmental Laboratories, Inc., which is one of North America's largest EPA-certified drinking water testing laboratories. Our team of scientists have more than 150 years of combined experience. We do one thing very well...test water! The #1 question asked by people who receive results from testing their drinking water: "What do I do now?" Safe Home[®] is the ONLY drinking water testing entity in the US that provides an A-Z platform for consumers:

- **DIY TESTING** - an economical place to begin testing with our Starter Series of test kits.
- **CONFIRMATION TESTING** - when DIY testing flags problem-contaminants, the consumer may request confirmation testing from our EPA-certified lab for more than 200 contaminants.
- **SOLUTIONS TO PROBLEMS** - more than 300,000 people travel to our website annually to find water testing and solutions to water contaminant problems. If your company provides water treatment solutions, please inquire about joining our Resources team.

COMPARE: As a professional who needs the very best in drinking water testing, look no further than Safe Home[®] Pro. You can now provide test kits to your customers who must have 100% of their testing performed in an EPA-certified lab. The Pro Series of test kits carry our strongest quality control packages, are simple to use and issue on-time test results. You can select from our proven line of test kits, or we can customize kits for you. In customized kits, we can provide specialized chains-of-custody and questionnaires. Our goals are to provide your customers with great testing services and to provide you with more opportunities to improve your bottom line.

TEST RESULTS: We can distribute test results to meet your needs—to you only, to your customer only or to any group of people you desire.

100% CERTIFIED LAB TESTING MADE EASY: We bring EPA-certified lab testing to your customer's front door. Your customer collects their water sample and places it inside the provided return-shipper*, registers their kit online and then ships their water sample back to our lab for testing. Safe Home[®] issues a certified lab report in just a few business days. Plus, third-party testing by our nationally recognized laboratory provides additional integrity to your company.

*Note: Safe Home[®] Pro test kits require you or your customer to pay for return shipping of the water samples to our laboratory for testing.

****GUARANTEES THAT GIVE YOU CONFIDENCE AND MAKE YOUR CUSTOMERS HAPPY**:**

- * **ON-TIME TEST RESULTS** - We send test results when promised or we provide you with an identical test kit—FREE.
- * **EXCEPTIONAL PERFORMANCE** - We back our test results with a multimillion dollar performance policy on all Safe Home[®] test kits.

VETTING OUR PRODUCTS: Third-party testing is important to the integrity of our brand. We have provided test kits to numerous entities for vetting, including Merck Laboratories, Underwriter Laboratories, American Red Cross Laboratories, National Water Systems Council, Oprah Winfrey Network, Women's World Magazine, Earth 911 Network, Green Living Network, Health Radio Network and First Time Parent Magazine.

IN THE NEWS: Industry Edge named Safe Home[®] Drinking Water Test Kits as one of the "Top Nine New Products" at the 2017 National Hardware Show.

WHERE TO SELL OUR KITS: You very likely know where and how you want to sell our kits. However, from experience, we have a few suggestions:

- **WATER TREATMENT PROFESSIONALS**
- **SPECIAL SERVICES** - Home Inspectors, Realtors, and Lending Institutions (FHA, VA & USDA).
- **MANUFACTURING** - Product Research & Development.

GIVING BACK: With each sale of our Safe Home[®] Drinking Water Test Kits, we are proud to provide financial support to the following not-for-profit organizations and their clean water initiatives: World Vision, Water.org, Water Is Life, Water For People, and Charity Water.

CREATING JOBS FOR CHALLENGED ADULTS: We are privileged to be partnering with Developmental Services, Inc. of Indiana for the assembly and distribution of our test kits. DSI employs adults with physical, mental and emotional challenges.

Safe Home[®] Kits are Made in the USA
